COMPLETE TOPS

RT Off-Road's Complete Soft Tops include everything needed to install a soft top: Soft Top, Windows, Frame, & Hardware. Each top also includes soft top disconnects, a soft top storage bag for easy and safe storage, as well as other features that are built into the top, like storage pockets. The improved frame design allows for ease of use and folds down when not in use.

TJ	97/06	Spice	RTS20037T

BOWLESS SOFT TOPS

Frameless soft top installs over factory installed roll bar for a snug fit with no additional bows or supports. This design allows for larger side windows and improved visibility with removable side and rear windows that quickly convert the soft top to an open Safari top. Tinted windows and storage pockets included.

Note: Requires windshield channel, factory soft door surrounds and tail gate bar which are standard equipment on factory soft top applications. If the soft top is replacing a hard top application, additional parts are required and can be purchased separately.

SEAT COVERS SETS FOR YJ, TJ WRANGLERS™

These easy to install seat covers are made from durable poly canvas.

The front seat sets include 2 front seat covers, 2 shoulder harness belt pads and a steering wheel cover. The covers have adjustable side lace-up draw cords that create a snug fit. Front and side mounted zippered mesh pockets add convenient storage space. Large rear pockets add additional rear access storage space. Included rear carabiner clip is handy for hanging and securing small items. The steering wheel cover installs in seconds without glue or tape. The rubberized interior of the steering wheel cover allows for exceptional grip.

The rear seat sets include one bench seat cover and two shoulder harness belt pads. There is a large storage pocket on the back side of the seat cover.

Both front and rear sets are available in 3 color combinations: Black/Gray, Black/Tan and Black/Red.

BUMP STOP SET

Polyurethane Construction;
5" long. Simple installation.
Designed for vehicles with
suspension lift. Limits
suspension travel to help clear
oversized off road tires.

RT Off-Road's Extended Bump Stops prevent expensive body damage to lifted Jeep vehicles. They measure 5" long and install in place of the factory foam bump stops. The polyurethane construction results in a longer product life and improved suspension control. They can be shortened to achieve the perfect amount of suspension articulation while still preventing the tires from contacting the body.

HEAVY DUTY ADJUSTABLE FRONT TRACK BAR

For vehicles with 0-5" of lift. 1.25" DOM tubing. Requires no drop brackets, drilling. Black powder coated finish. Will not work on right hand drive vehicles.

RT Off-Road's adjustable track bar is a heavy-duty adjustable upgrade over your factory bar. The treated assembly allows you to dial in your suspensions alignment to guarantee the axle is centered under the front of the vehicle. The 1.25" Drawn Over Mandrel Tubing has a heavy wall thickness that will withstand years of abuse on the trails.

HEAVY DUTY BALL JOINT SET

Set includes 1 Upper and 1 Lower Ball Joint with Hardware.

The construction of our heavy duty ball joints are steps ahead of an OE style ball joint. We redesigned the internal assembly of the ball joint by replacing the plastic bushings with sintered metal. The characteristics of the sintered metal result in a heavy duty ball joint that will long outlast an OE style ball joint. Installation of our heavy duty ball joints is no different when compared to an OE style ball joint.

PERFORMANCE AXLE SETS

Continuing with our tradition of high-quality heavy-duty parts, RT Off-Road offers performance axle kits for Dana 35 and Dana 44 rear axles. These axles use the stock spline count to eliminate the need to purchase an aftermarket differential carrier or locking differential. This cuts costs considerably in both parts and labor.

They are made of SAE-4340 high-strength alloy which is heat treated to achieve ideal hardness. The heat treating process improves both tensile and torsion strength by at least 30% while increasing wear resistance. Due to the hardness of the steel the splines are rolled, not cut like a stock axle. Rolled splines will not compromise the integrity of the shaft like cut splines will.

These are sold in kits and include 2 axle shafts with tone rings, seals, bearings, retainers, and wheel studs.

SLIP YOKE ELIMINATOR & HD CV PROPELLER SHAFT KIT

This kit contains everything you need to convert the rear output of the NP231 transfer case to a fixed-style yoke. Included in this kit is a heavy duty 32 spline main shaft, a short output housing, a CV-style yoke and all the necessary hardware. When paired with the provided propeller shaft, these will result in an extremely strong, vibration free driveline that will provide you with years of worry free driving.

HIGH PERFORMANCE BRAKE ROTORS

Introducing RT Off-Road's new line of Drilled and Slotted Brake Rotors! These rotors will take what you throw at them and keep coming back for more; from conquering a steep descent in Moab, Utah, as well as the 2,000 mile trek home.

The cross drilled holes and machined slots provide maximum cooling to the brake pad and rotor surfaces, helping to eliminate brake fade. Improved heat dissipation decreases the chances of rotor warping. They are designed to rapidly expel friction gases, debris and water for greater braking response and performance. A sporty look is an added bonus to these hard working rotors. Sold in sets of 2.

Complete Brake Kits with Drilled & Slotted Rotors

RT Off-Road's newest brake kits couple our new cross-drilled and slotted rotors with brake pads and a hardware kit (ranging from boots, springs, sleeves, pins) to ensure that the calipers function the way that they should.

The cross-drilled and slotted rotors are designed to improve braking performance in all situations by addressing some shortcomings of a conventional brake rotor. The slots and holes that are machined into the face of the brake rotors act as an outlet for heat that is created from the friction of the pad contacting the rotor. This decreases the chances of warping the rotors. The slots and holes also assist in helping gases to escape from the face of the rotor. This improves the braking performance by allowing the pad to come in full contact with the rotor instead of floating on these gases. Finally, these brake kits accent your wheel & tire combination.

WHEEL SPACER KITS

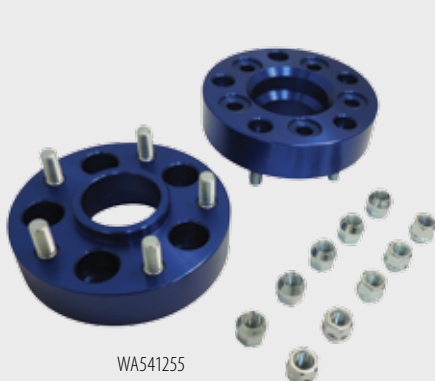

RT Off-Road's new Wheel Spacers are made from 1.5" thick 6061 T6 aluminum. These hub-centric and wheel-centric spacers are anodized blue for a long worry-free life. They come with Grade 8 studs pressed into the spacers, 10 lug nuts and thread locking compound. These will give you the aggressive look and improved stability you are looking for without breaking the bank on new wheels.

WHEEL ADAPTERS

Convert your vehicles bolt pattern conveniently and affordably with RT Off-Road wheel adapters. Changing your current bolt pattern to a more popular pattern will increase the choices of available models of factory/aftermarket wheels. Constructed with the same 1.5" thick 6061 T6 aluminum that our wheel spacer kits use. That 1.5" of additional clearance will help reduce tire contact when using oversized and off-road tires. These adapters have a hub-centric and wheel-centric design that is anodized blue for long lasting protection. Included are grade 10 studs press fit into a pair of adapters, ten lug nuts, and thread locking compound.
