BOWLESS SOFT TOPS

Frameless soft top installs over factory installed roll bar for a snug fit with no additional bows or supports. This design allows for larger side windows and improved visibility with removable side and rear windows that quickly convert the soft top to an open Safari top. Storage pockets included!

Note: Requires windshield channel, factory soft door surrounds and tail gate bar which are standard equipment on factory soft top applications. If the soft top is replacing a hard top application, additional parts are required and can be purchased separately.

SEAT COVERS SETS FOR YJ, TJ WRANGLERS™

These easy to install seat covers are made from durable poly canvas.

The front seat sets include 2 front seat covers, 2 shoulder harness belt pads and a steering wheel cover. The covers have adjustable side lace-up draw cords that create a snug fit. Front and side mounted zippered mesh pockets add convenient storage space. Large rear pockets add additional rear access storage space. Included rear carabiner clip is handy for hanging and securing small items. The steering wheel cover installs in seconds without glue or tape. The rubberized interior of the steering wheel cover allows for exceptional grip.

NEW!

The rear seat sets include one bench seat cover and two shoulder harness belt pads. There is a large storage pocket on the back side of the seat cover.

Both front and rear sets are available in 3 color combinations: Black/Gray, Black/Tan and Black/Red.

PERFORMANCE AXLE SETS

Continuing with our tradition of high-quality heavy-duty parts, Rough Trail by Crown offers performance axle kits for Dana 35 and Dana 44 rear axles. These axles use the stock spline count to eliminate the need to purchase an aftermarket differential carrier or locking differential. This cuts costs considerably in both parts and labor. They are made of SAE-4340 high-strength alloy which is heat treated to achieve ideal hardness. The heat treating process improves both tensile and torsion strength by at least 30% while increasing wear resistance. Due to the hardness of the steel the splines are rolled, not cut like a stock axle. Rolled splines will not compromise the integrity of the shaft like cut splines will. These are sold in kits and include 2 axle shafts with tone rings, seals, bearings, retainers, and wheel studs.

WHEEL SPACER KITS

Rough Trail by Crown's new Wheel Spacers are made from 1.5" thick 6061 T6 aluminum. These hub-centric and wheel-centric spacers are anodized blue for a long worry-free life. They come with Grade 8 studs pressed into the spacers, 10 lug nuts and thread locking compound. These will give you the aggressive look and improved stability you are looking for without breaking the bank on new wheels. Available in two sizes: 5 on 5" and 5 on 4.5"

HIGH PERFORMANCE BRAKE ROTORS

Introducing **ROUGH TRAIL'S** new line of Drilled and Slotted Brake Rotors! These rotors will take what you throw at them and keep coming back for more; from conquering a steep descent in Moab, Utah, as well as the 2,000 mile trek home.

The cross drilled holes and machined slots provide maximum cooling to the brake pad and rotor surfaces, helping to eliminate brake fade. Improved heat dissipation decreases the chances of rotor warping. They are designed to rapidly expel friction gases, debris and water for greater braking response and performance. A sporty look is an added bonus to these hard working rotors. **Sold in sets of 2.**

COMPLETE BRAKE KITS W/ DRILLED & SLOTTED ROTORS

NEW!

ROUGH TRAIL'S newest brake kits couple our new cross-drilled and slotted rotors with brake pads and a hardware kit (ranging from boots, springs, sleeves, pins) to ensure that the calipers function the way that they should. The cross-drilled and slotted rotors are designed to improve braking performance in all situations by addressing some shortcomings of a conventional brake rotor. The slots and holes that are machined into the face of the brake rotors act as an outlet for heat that is created from the friction of the pad contacting the rotor. This decreases the chances of warping the rotors. The slots and holes also assist in helping gasses to escape from the face of the rotor. This improves the braking performance by allowing the pad to come in full contact with the rotor instead of floating on these gasses. Finally, these brake kits accent your wheel & tire combination.

CV JOINT REPAIR KITS

NEW!

Replaces Part #

FRONT - 520994FRK

Introducing Crown Automotive's CV Joint Repair Kits. These kits are an inexpensive alternative to replacing the entire propeller shaft and will produce the same end result; a worry-free and quiet operating drivetrain. It contains the CV joint, boot, housing halves (where needed), clamp(s), hardware, and grease. All of these parts are made with quality and a long life in mind. P/N: 520994FRK will service the joint at the axle end on the front propeller shaft and P/N: 520994RRK will service the joint at the transfer case end on the front propeller shaft.
